

## SUMMATIVE ASSIGNMENT: METAPHYSICS, 6AANB051

DEADLINE: 10 JANUARY 2024, 16:00

For details of the format, as well as some video examples, please see the KEATS page.

In short, your video assignment will be marked on the same criteria as a written assignment would be: understanding, knowledge, clarity, style. You will also need to submit a supporting document to Turnitin. If you use powerpoint or similar, you should submit a PDF of your slides. (You will be assessed on the video alone; the Turnitin submission is for a standard plagiarism check.)

Here are some possible choices of topics. **You can also choose your own**, but if you do, please check with me if it is suitable for a summative paper. Your summative paper needs to be on a different topic than your formative one.

- Can accidents exist on their own?
- How does the hylomorphic theory apply to human beings? Is a person immortal?
- Is atomism more plausible than hylomorphism?
- How would one apply the hylomorphic theory to the puzzle of the Ship of Theseus?

**Length:** Maximum 20 minutes (but mostly around 15).

**Submission:** Please submit your video essay on KEATS, under “media assignment”. Please don’t forget to also submit your supporting document to Turnitin.
